THE DISTRIBUTION OF MALAY DIALECT

PREVIOUS STUDY

Asmah (1993)

- specifically describes and draws the linguistic boundaries or isoglosses that dissect various Malay dialects based on phonological, lexical and lexico-semantics features

Result

- the linguistic boundaries that demarcated the dialects are drawn based on impressionistic analysis with very limited geographical information, as well as linguistic data.

Geo-linguistics

- Integrating dialect with GIS.
- Isogloss drawn is more systematic.
- Lee and Kretschmar - LAMSAS (1993)
- Luo et.al (2000)
- Teerarojanarat and Tingsabadh (2008, 2011)

METHODOLOGY

fieldwork

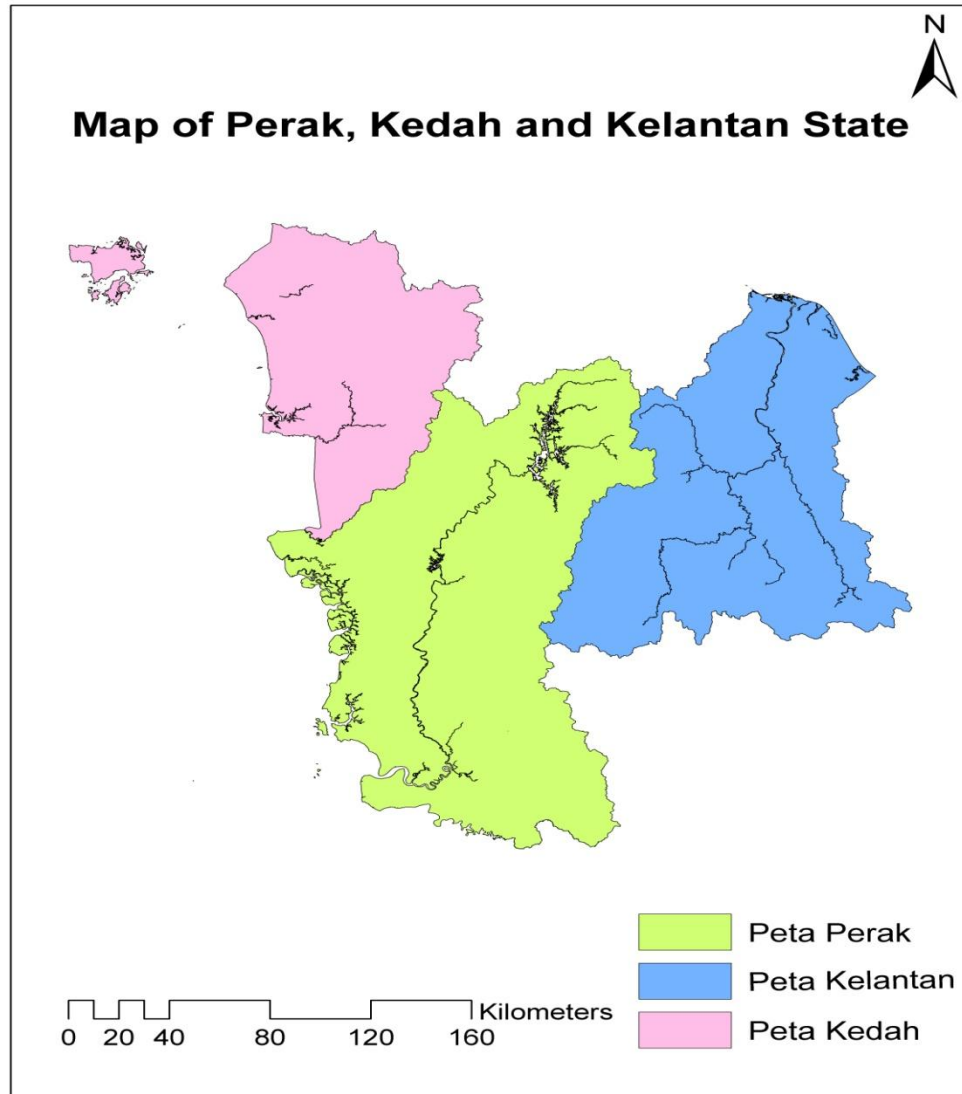

360 respondents

38 villages,
North Perak

Interviews,
questionnaires,
wordlist

Phonetic
transcription,
Microsoft Office
Excel, GIS

NORTH PERAK AND IT'S BORDERS

TOPOGRAPHY

ANALYSIS AND FINDINGS

Pronouns: I, you and they

Variants of pronouns found

Dialect from neighbors influenced the Northern Perak dialects

Kedah (west),
Pattani Malay
(north), Kelantan
(north eastern) and
Perak (south)

Topographic factors play an important role

CONT.

Topography of North Perak

An array of highlands that dissects the zone into two. One side facing Kedah and the other facing the southern Thai and Kelantan.

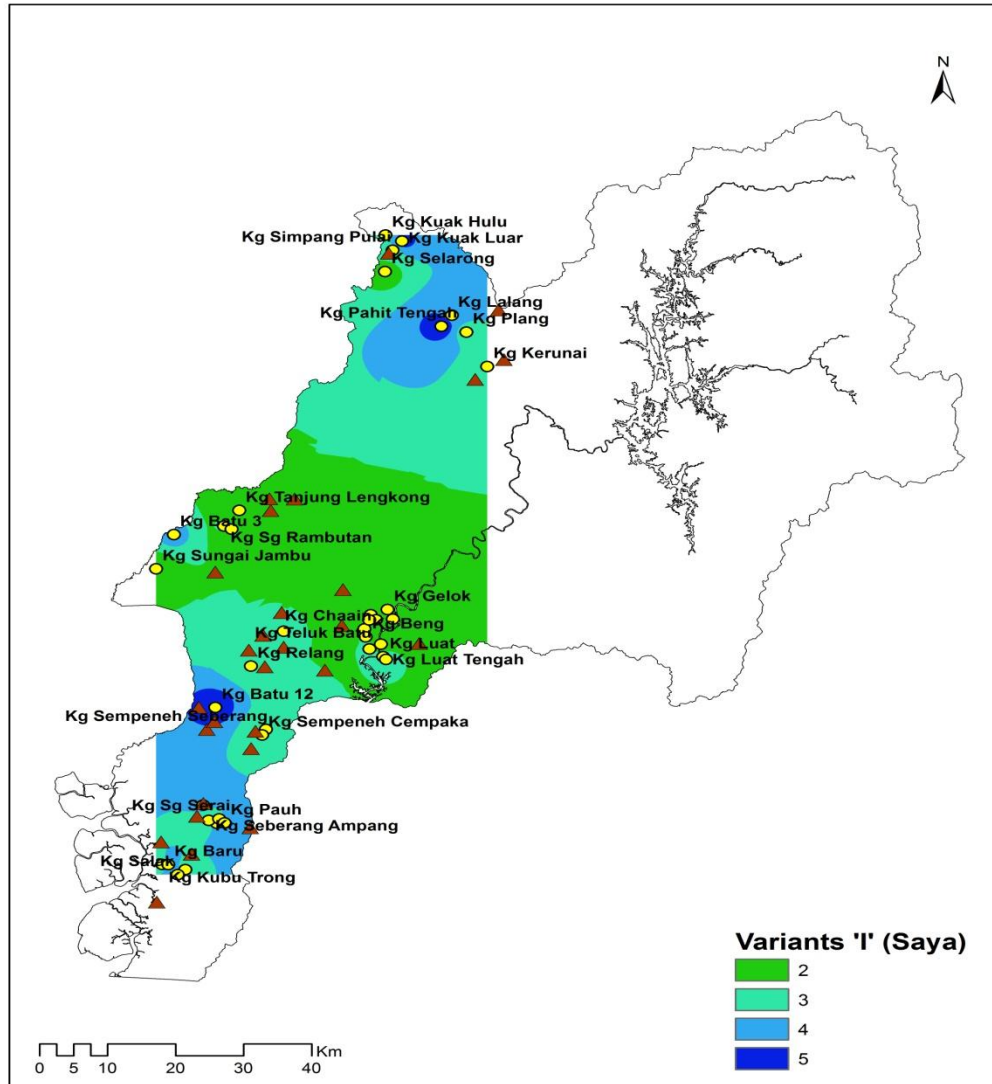

A big river known as Sungai Perak originated from Hulu Perak and ends at southern zone (Lenggong and Kuala Kangsar). In this area lies the lowlands.

A large lake to the east of Hulu Perak formed a large area of wetlands and very lightly populated. Most of the population in this area are Aslian people.

THE DISTRIBUTION OF VARIANTS 'I' (SAYA)

Lexical (L)	Larut Matang & Selama		Hulu Perak		Total	
L1- saya	2	(50%)	0	(0%)	2	(25%)
L2- sayə	3	(75%)	4	(100%)	7	(87.5%)
L3- sayɔ	1	(25%)	2	(50%)	3	(37.5%)
L4 – aku	4	(100%)	4	(100%)	8	(100%)
L9 – kami	2	(50%)	1	(25%)	3	(37.5%)

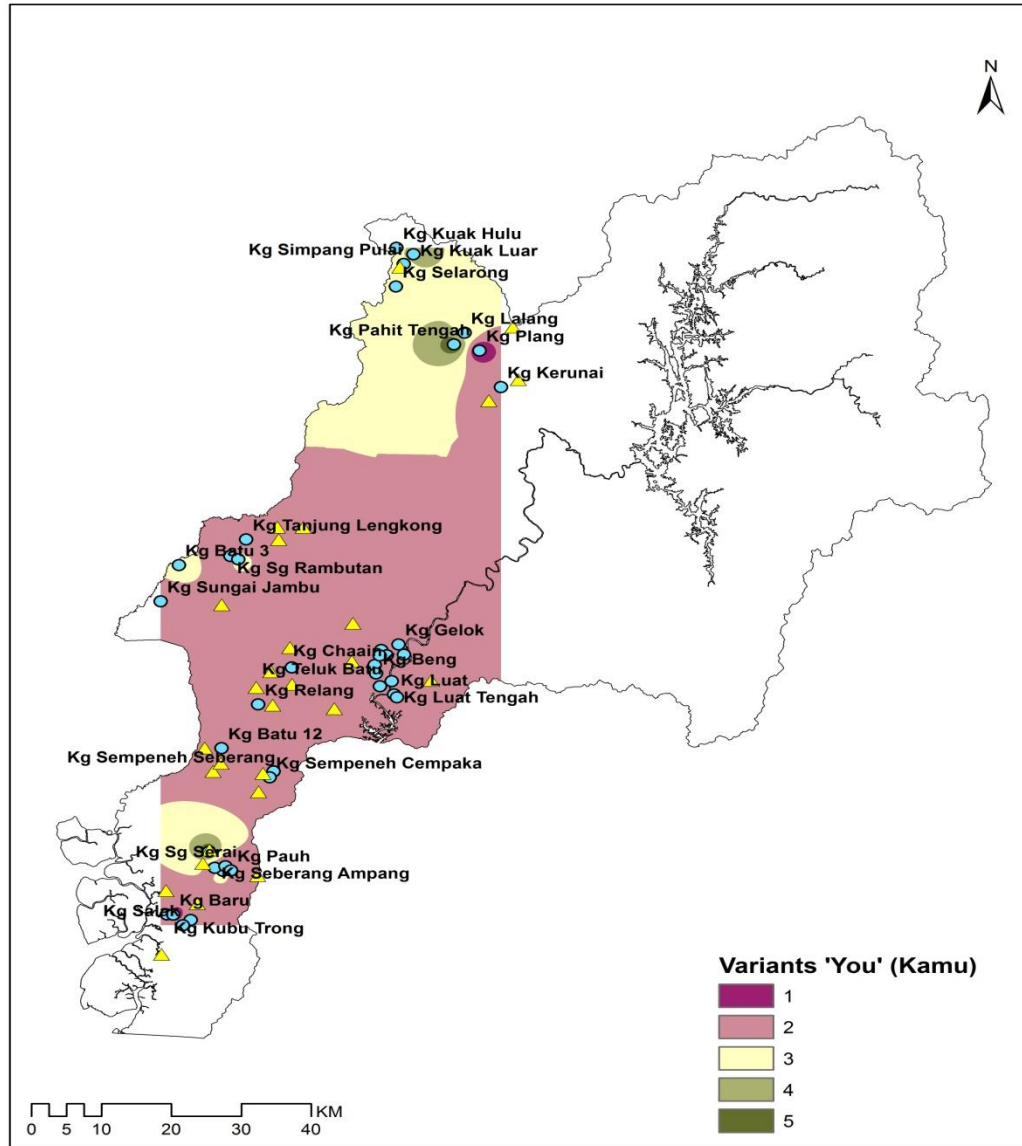

THE DISTRIBUTION OF 'I' -GIS

THE DISTRIBUTION OF VARIANTS 'YOU' (KAMU)

Lexical (L)	Larut Matang & Selama		Hulu Perak		Total	
L1 - kamu	3	(75%)	3	(75%)	6	(75%)
L2 - mu	2	(50%)	2	(50%)	4	(50%)
L3 – mung	0	(0%)	1	(25%)	1	(12.5%)
L5 - hangpa	1	(25%)	0	(0%)	1	(12.5%)
L6 – hang	3	(75%)	3	(75%)	6	(75%)
L9 – awak	1	(25%)	0	(0%)	1	(12.5%)
L11 - dəmə	0	(0%)	1	(25%)	1	(12.5%)

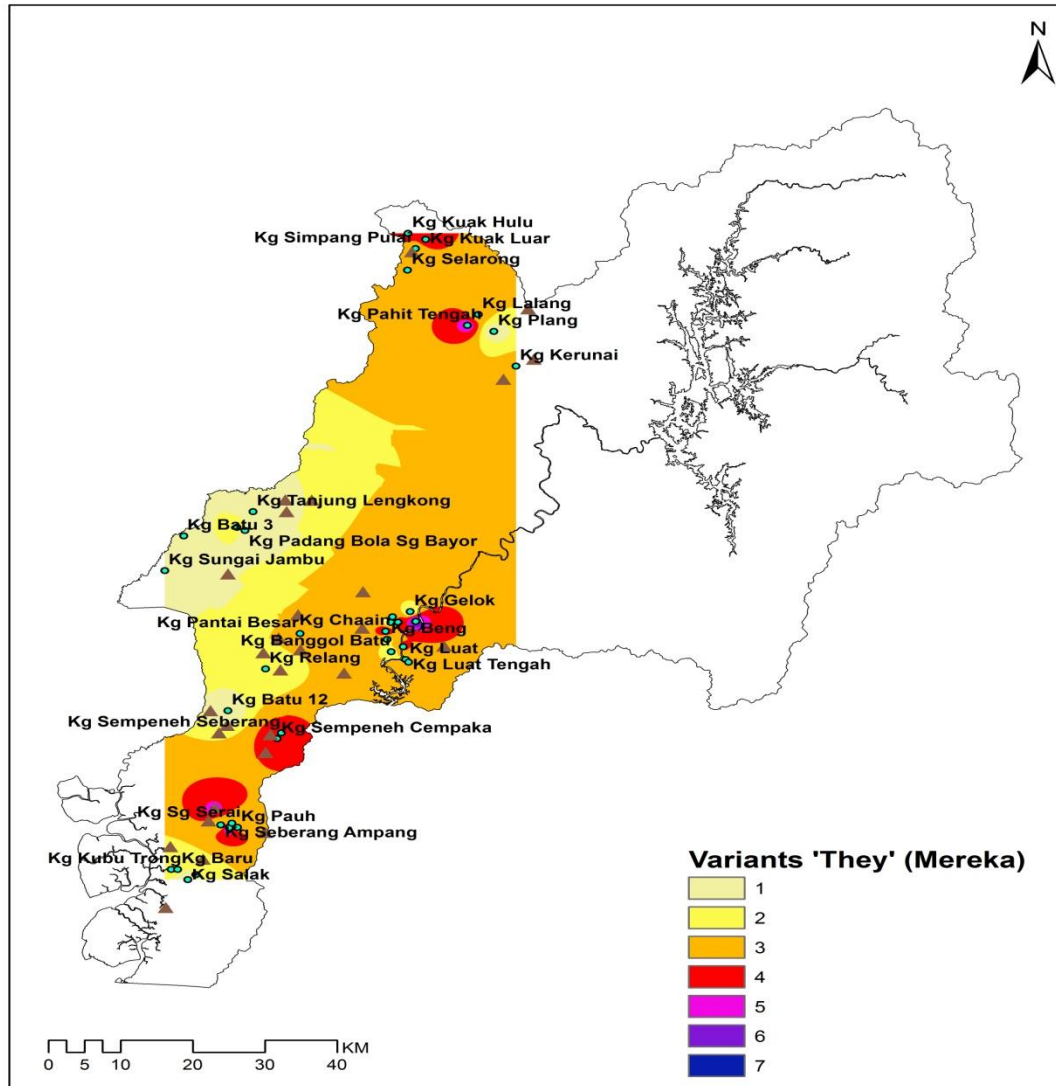

THE DISTRIBUTION OF 'YOU' - GIS

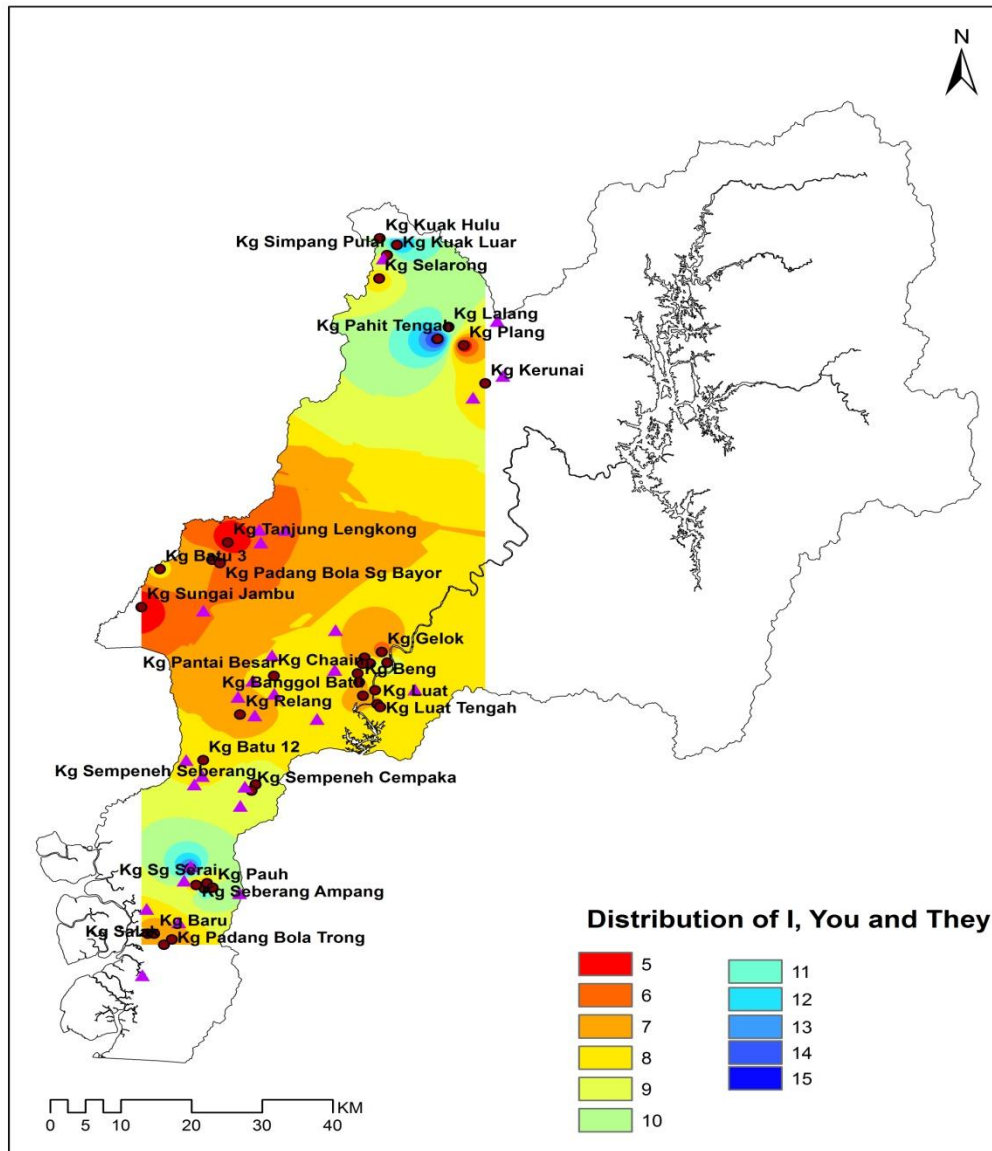

THE DISTRIBUTION OF VARIANTS 'THEY' (MEREKA)

Lexical (L)	Larut Matang & Selama		Hulu Perak		Total	
L1- dema	1	(25%)	0	(0%)	1	(12.5%)
L2 - demə	2	(50%)	2	(50%)	4	(50%)
L3- demə	1	(25%)	4	(100%)	5	(62.5%)
L4 – depa	4	(100%)	2	(50%)	6	(75%)
L6- dəpə	2	(50%)	1	(25%)	3	(37.5%)
L7 – hangpa	2	(50%)	0	(0%)	2	(25%)
L10 - mikə	0	(0%)	1	(25%)	1	(12.5%)
L13 -məyəkə	0	(0%)	1	(25%)	1	(12.5%)
L14 – moha	0	(0%)	1	(25%)	1	(12.5%)

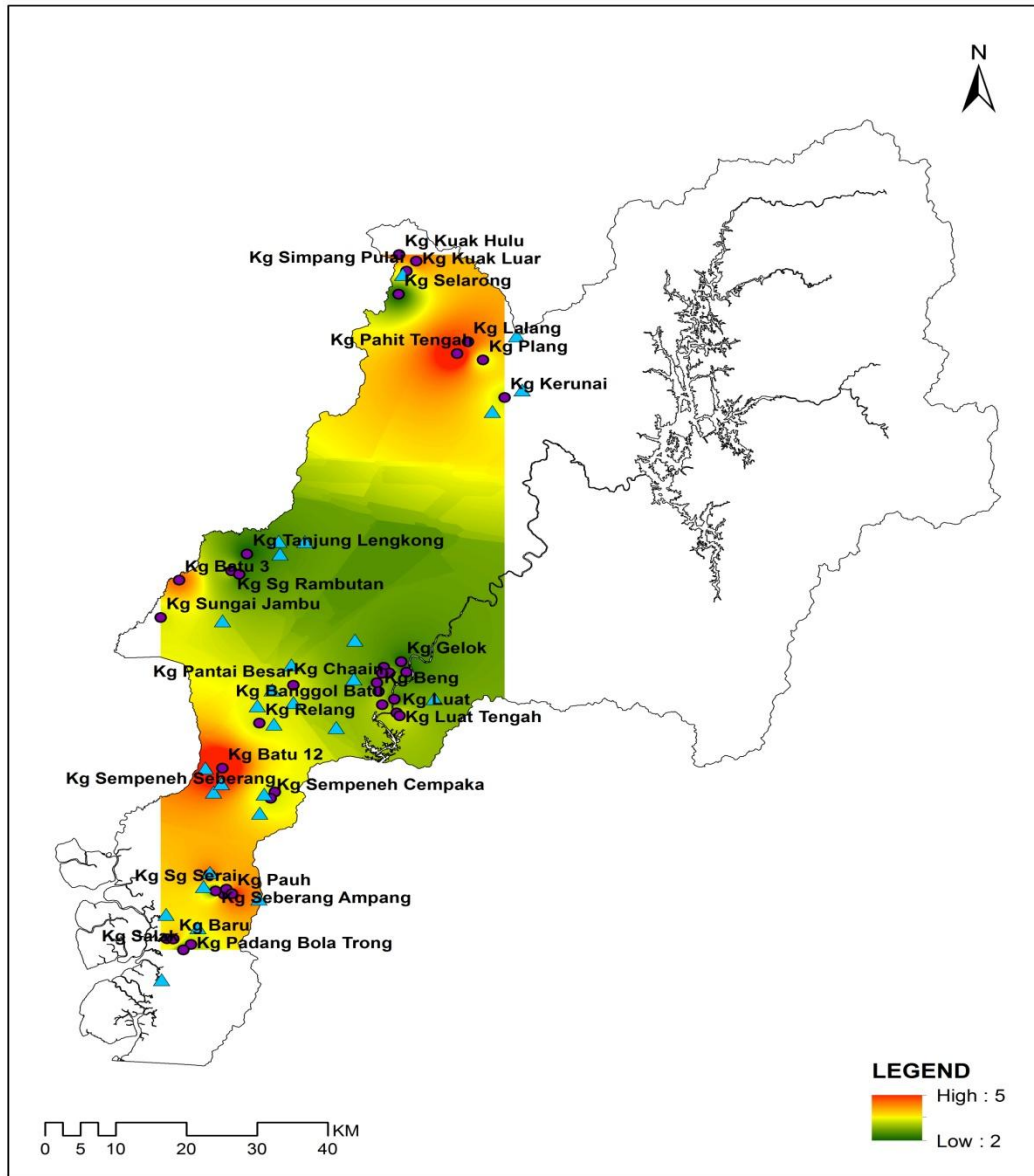

THE DISTRIBUTION OF 'THEY' - GIS

THE DISTRIBUTION OF PRONOUNS

THE OVERLAY OF 'I'

CONCLUSION

1

- The multiple variants appear in the lowlands, near a river, a densely populated area with many transportations access to the area.

2

- While interior area surrounded by highlands with no major access road will have the least variants of pronouns.

3

- GIS is considered as a reliable tool in mapping the distribution of the Malay dialect.
