# Translation of Nemi Mang

sang ba phav au tho phrat laai cham ya am bai ya svng bai cham sang ba am bai cham pha sang nv nu mau.

သင် ဝျး ၽွ် အဝ် ထျေ ၽတ်း လျံး ထမ်း ယျ, အမ် ဝံ. ယျ, သိူင်, ဝံ. ထၢမ်း သင် ဝျး အမ် ဝံ. ထမ်း ၾု. သၢင် ဆိူဝ် လူ မွ်း ၊၊

'And if a person is working to read and understand this book, do not conceal it, do not hide it, but if you do try to conceal it, the creator above in the sky is looking at you.'

### The Tangsa

- The two 'languages' called Tangsa (ISO 639-3:nst under the name 'Naga, Tase') and Nocte (ISO 639-3:njb 'Naga, Nocte') are internally diverse and closely related to each other.
- In Myanmar, the name Tangshang (not cognate with Tangsa) was adopted in 2003
- 70+ sub-tribes within Tangsa and Tangshang (listed at <a href="http://en.wikipedia.org/wiki/Tangsa\_people">http://en.wikipedia.org/wiki/Tangsa\_people</a>
- Each sub-tribe has a distinct linguistic form, sometimes mutually intelligible with others, and sometimes not. The linguistic diversity is in terms of (1) sound change, (2) vocabulary, (3) different word structure, and (4) differences in grammatical features.

#### Mungray dance troupe – led by Yonglun

#### Linguistic Variation - Pangwa, Tikhak, Muklom and Hakhun

Gl <b>os</b> s:	Cholim	Lo- chhang	Rera	Joglei	Tikhak	Yong- kuk	Muklom	Hakhun	Hehle
drinking water	k <sup>h</sup> am <sup>2</sup>	$k^h \epsilon^2$	k <sup>h</sup> am <sup>2</sup>	kham	k <sup>h</sup> am <sup>2</sup>	k <sup>h</sup> am <sup>2</sup>	jung	фu²	3w²
river (water)	30 <sup>2</sup>	ʤjaŋ²	30 <sup>2</sup>	jong	k <sup>h</sup> am <sup>2</sup>	k <sup>h</sup> am <sup>2</sup>	jung	фu²	$3m^2$
alcohol	c <sup>h</sup> ai <sup>1</sup>	c <sup>h</sup> aw <sup>1</sup>	$c^h e^1$	chol	$3u^2$	30 <sup>2</sup>	kham	k <sup>h</sup> am <sup>2</sup>	k <sup>h</sup> am <sup>2</sup>

The lexemes (words) for 'drinking water', other types of 'water' and 'alcohol' can be used as a diagnostic, a suggestion first made to us by Rennan Longri of Kharang Kong village. We have shaded the form *kham* in grey to demonstrate the differences.

#### Comparison – Champang and Cholim

Gloss:	Champang	Cholim
snake	punu	pu <sup>3</sup>
bee	ne?nu	$\mathfrak{p}$ ?
monkey	jukku	$\beta o^1$
pig	wekku	$\beta ak^1$
mouse, rat	ju?po	3u? <sup>2</sup>
buffalo	lumo	$ m ne^2$
elephant	bokla	$c^ha^1$
tiger	sepbe	$c^h j \gamma \gamma^1$
bear	sepba	cap <sup>2</sup> ba <sup>1</sup>
ant	sjamu	$xip^1xa^1$
deer	kahu	$k^h i^1 go^2$
cattle (bovine)	mensu	men <sup>1</sup> su <sup>2</sup>
frog	lutja	luk¹ha¹

# Table 1: Jinghpaw SFW agreement endings (From DeLancey 2010)

```
1<sup>st</sup> -iŋ/-eŋ -iʔ/-eʔ
2<sup>nd</sup> -in/-eŋ -it/-et
```

# Observations I - Transitivity

Mueshaungx has two verb classes, with different endings in the future, depending on whether the verb is transitive or intransitive

Rinkhu possibly has different endings for transitive and intransitive verbs in the past

### Observations II - Negation

- 2) Negation. All varieties have a postpositional particle / postclitic / suffix to indicate negative, except for Rera and Khalak. Mergers in the NEG singular 1-3 in Mungray, 2 & 3 in Mueshaungx, Ngaimong, Joklei, and Phong 1 & 2 in Lochhang (but not in Chamchang)
- 3) Rera (and Rinkhu) express negation with a prepositional particle / prefix mi- followed by agreement markers. Khalak, same as Singpho and song language.
- 4) The Negative forms in Phong all have back vowels /u/, except for the 1<sup>st</sup> plural, which still has the /i/ vowel but the consonant is expressed with a labio-velarisation, which we have notated as /m<sup>w</sup>i/,

#### Observations III: Future

- 5) This is shown by a prepositional particle / prefix commencing in m- in Cholim, Longri, Lochhang, Chamchang, Mungray, Rera; by a prefix a- in Ngaimong and Joklei; in each case these are invariant forms and the person/number is marked by an element following the verb. The initial consonant of this form in Mungray is η- which may be related to the Muklom n-.
- 6) There is no form prefixing or preceding the verb in the other varieties, but postclitics with initial n- in Muklom, f- in Mueshaungx, c- in Yongkuk, tç- in Tikhak and person/number agreement. There is no preceding consonant in Hakhun or Phong.

#### Observations IV: Past

7) PAST: All past constructions employ postpositional particle / postclitic / suffix. This commences with t- in Rera, Mueshaungx, Ngaimong, Joklei, Muklom, Yongkuk, Tikhak, Hakhun; in k- (except for 3<sup>rd</sup> person t-) in Cholim and Longri, and k- and l- mixed with t- in Lochhang and Chamchang. As with the negative, Mungray has merged the forms for all three singular persons to -ta?.

# Observations V: Final stops v nasal/open

Final nasals / open throughout found as follows

all future forms, (ii) all forms in Rera and (iii)
 Chamchang, Lochhang, Muklom and Yongkuk past

Final stops throughout are found in:

 Mungray negative and (ii) Mueshaungx, Ngaimong and Joklei negative and past

Mixed systems (3 is stop, others open)

- Longri and Cholim, Tikhak negative and past
- Lochhang and Chamchang and Muklom, Yongkuk negative only
- Hakhun has final stop only in the past and negative
   2PL

# Observations VI: 1st singular finals

- All the varieties have a velar stop (either oral or nasal) for the 1<sup>st</sup> person singular, except for
  - Lochhang 1Sg negative, which has merged with the 2<sup>nd</sup> person in the form *mau*,
  - Lochhang and Chamchang 1Sg future, both of which have -a finals
  - Cholim and Longri 1Sg past, both of which have final -o. This does appear to be a regular sound change between a putative proto -\*aŋ and /-o/ in these two varieties for grammatical words, for example the negative existential /agjo/ in Cholim is /aɣjaŋ/ in Lochhang.

#### Observations VII: Vowels

The vowels of the second plural are /a/ vowels in Lochhang, Chamchang, Rera, Mungray, Yongkuk, Tikhak, Hakhun and Phong; -/i/ vowels in Cholim, Longri, Ngaimong, Joklei, Muklom, mixed in Mueshaungx.

### Observations VIII: Irregularities

- Tikhak FUT.3 form with –i? is not found in other varieties.
- -Irregular -n in the 2PL in Cholim

# Champang

PRESENT a-V

FUTURE a-V-ka?

PAST V-wa

DID V-kewa

NEG V-la

IMP.SG V-la?

IMP.PL V-pa?

PROH V-ka?

# Hierarchical Marking

Table 1: Hakhun Hierarchical agreement markers - 3rd singular agents

-10000000	3sg>3	3sG>1sG	3SG>1PL	3sg>2sg	3sG>2PL
Future	Va <sup>3</sup>	V-a <sup>3</sup>	V-a <sup>3</sup>	V-a <sup>3</sup>	V-a3
Continuous	V-ka1	V-ry <sup>1</sup>	V-ri <sup>1</sup>	V-ru <sup>1</sup>	V-ran <sup>1</sup>
Negative	V-ma1	V-remy <sup>1</sup>	V-rəmi <sup>1</sup>	V-ramo	V-remat <sup>a</sup>
Past	V-ta <sup>1</sup>	V-thy1	V-thi <sup>1</sup>	V-thu1	V-than <sup>1</sup>

#### Questions

- Why do some varieties have hierarchical marking and others not?
- Why is there no person marking at all in Champang?
- What is the historical explanation of the stop-final ~ nasal/open-final alternation
- How did the prefixal / prepositional future develop?
- How did a prefixal / prepositional negative develop? Or is the suffixal form the innovation?
- Why are k- forms found in the past in some varieties?

#### Proto forms

1		2	3	
Sg	Plu	Sg	Plu	
-Cvelar	-V high front	-V high back	-C alveolar	

# Past in Chamchang and Lochhang

- adoption of k- initials in the non3 past (in common with Cholim and Longri)
- adoption of I- initials (perhaps taken from the continuous) in 2<sup>nd</sup> person forms
- creation of a new continuous by prefixing a t-, incidentally the historical past form.
- 3past retains t-, as the most conservative of the person endings (cf English thinks)

# Rera and Lochhang compared

'I am not able to carry'

Rera: *mi gun nok laŋ* 

Lochhang: yui dai mau

(*mi* is the **future** prefixal particle in Chamchang and Lochhang)

#### How to access data

- Go to <a href="http://corpus1.mpi.nl/ds/imdi\_browser/">http://corpus1.mpi.nl/ds/imdi\_browser/</a>
  - click on **DoBeS archive**
  - and then on *Tangsa, Tai, Singpho in North East India* to access our data.
- Linguistic transcriptions of the Tangsa and Ahom materials are also being made available, in searchable format, via SEALANG at <a href="http://sealang.net/assam">http://sealang.net/assam</a>
- Ahom Dictionary at <a href="http://sealang.net/ahom">http://sealang.net/ahom</a>
